Police Department

2004 ANNUAL REPORT

A.M. JACOCKS, JR. CHIEF OF POLICE

MISSION STATEMENT

The Virginia Beach Police Department is committed to providing a safe community and improving the quality of life for all people. We accomplish this by delivering quality police services and enforcing laws with equity and impartiality. In partnership with the community, we reduce crime through public education, prevention, and awareness. In meeting this objective, we demand of ourselves the highest professional standards and dedication to our core values.

VISION

The Virginia Beach Police Department will be the premier law enforcement agency setting the standard for excellence. Committed to those we serve, we adapt to change, while focusing on value-based principles, lifelong learning, and professional growth.

CORE VALUES

Professionalism... in our actions, conduct and job performance. Constantly striving towards ever-rising standards.

Respect... for all citizens, each other, and for differing points of view, regardless of age, race, gender, appearance, individual beliefs, or lifestyles.

Integrity... truthful and honest, deserving of trust. Ethical. Being guided by the concept of fundamental fairness in everything we do. Doing what is right.

Dedication... to the organization, each other, our families, and the citizens we serve. Unquestionable work ethic.

Excellence... in everything we do. Seeking to improve and excel, always.

Dear Mr. Spore:

On behalf of the City of Virginia Beach Police Department, I am pleased to provide you with a copy of the Virginia Beach Police Department's 2004 Annual Report. This report describes our wide variety of activities, defines the various groups within our department, provides highlights and statistics, and summarizes our accomplishments.

The department implemented several new initiatives in 2004 and expanded others. Initiatives such as STARS, PHOTOSafe, AEDs, community policing, the annual DUI conference, and continuing education programs have all been successful in enabling us to better analyze criminal activities, provide more effective law enforcement services, and enhance the overall safety of our city.

During 2004, one of our major areas of focus was community involvement. We accomplished this in cooperation with our precincts' Citizens' Advisory Committees (CAC). CAC continues to be an active and effective community liaison organization and was one of the driving forces behind the overall success of our precincts. Our commitment to Enhancing A Culture Of Integrity continues to be a priority. In November, we hosted the Community Summit, a gathering of law enforcement professionals from local, state, and federal agencies; minority organizations; city and community leaders; members of other city agencies; crime victims; and military representatives.

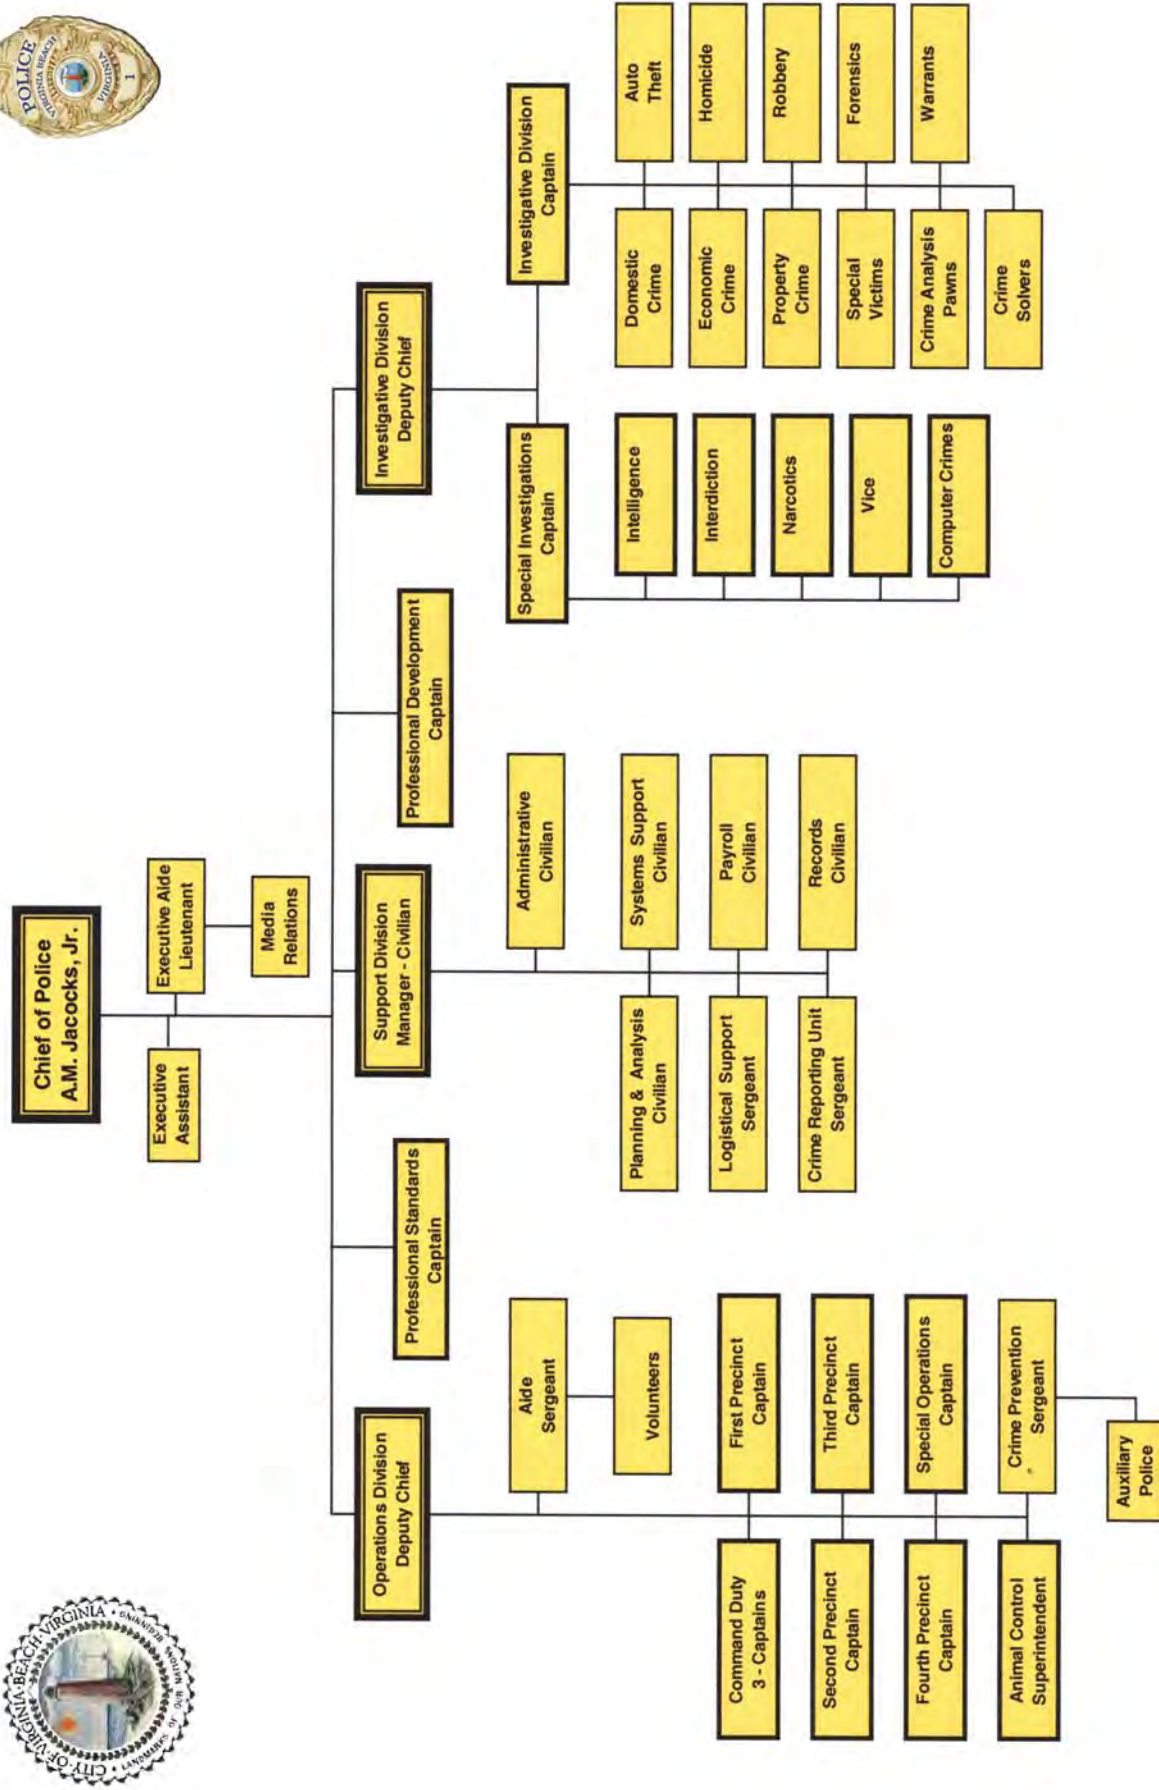

It is our ever-present objective to accomplish our vision of being the premier law enforcement agency and our mission to provide a safe community while improving the quality of life for all people. These goals are accomplished through your support, community involvement, and the hard work and efforts of every member of this department. We take pride in the fact that the crime rate for Virginia Beach has fallen for the fourth consecutive year and is the lowest it has been since 1968. We also maintained a low violent crime rate comparable to cities half our size.

The items emphasized in this introductory letter represent only a small fraction of the numerous accomplishments made by the police department during 2004. We invite you to review the pages of this report to share in our success.

Sincerely,

A handwritten signature in black ink, reading "A.M. Jacocks, Jr.".

A.M. Jacocks, Jr.
Chief of Police

DIRECTOR'S OFFICE

The Director's Office is led by Chief A. M. Jacocks, Jr. The office consists of the Chief of Police, administrative staff, Professional Standards, Media and Public Relations, the Community Relations Chaplains Program, and Accreditation Standards. The mission of this office is to provide direction and leadership, while maintaining and increasing the integrity of the department.

Professional Accomplishments

In 2004 Chief Jacocks was named to the Executive Board of the Major Cities Chief's Association as one of two trustees from the eastern region of the United States. This association is comprised of the 60 largest police departments in the United States and Canada.

In December 2003, Chief Jacocks was elected as the 2004 President of the Hampton Roads Association of Chiefs of Police. This association provides a forum to discuss issues of mutual concern and exchange ideas and program results. Additionally, it serves to foster regional cooperation and provides for a united voice from the Hampton Roads law enforcement agencies on topics such as state and federal legislative matters, issues related to the Department of Criminal Justice Services (DCJS) regulations and proposals, and matters pertaining to relationships with state and federal law enforcement agencies.

Governor Mark Warner also appointed Chief Jacocks to the Criminal Justice Services Board in May 2004. Nominated by the Virginia Association of Chiefs of Police, Chief Jacocks was sworn in by the Secretary of the Commonwealth, Anita Rimler.

Continuing Education

The Virginia Beach Police Department realizes the importance of continuing education and how it relates to the quality of service we provide to the citizens of our city. Over the past year, a total of eight department employees distinguished themselves with regard to their individual academic achievements by attaining their associate's, bachelor's, or master's degrees.

In September 2004, 13 members of the department began a Master of Science in Criminal Justice Cohort Program sponsored by Troy State University. This graduate course requires the participants to attend one night a week, five semesters a year for the next two years with an anticipated graduation in late 2006.

To ensure all members remain innovative and challenged, in 2001, Chief Jacocks revised the educational requirements for the different levels of rank within our department. Effective January 1, 2003, all officers participating in the promotional process for sergeant are required to possess a minimum of an associate's degree or the equivalent number of credit hours (60 semester hours) with a concentration in one of the following areas: law enforcement, administration of criminal justice, business administration, public administration, or a related field approved by the Chief. Likewise, those wishing to participate in the promotional process for lieutenant, captain, and deputy chief are required to hold a bachelor's degree or the equivalent of 120 semester hours from an accredited college or university. Our commitment to lifelong learning is a means toward a goal -- that goal being better policing.

Part I Crimes

Virginia Beach remains one of the safest cities of its size in the United States. The crime rate for Virginia Beach has fallen for the fourth consecutive year and is the lowest it has been since 1968. Part I Crimes include homicide, rape, robbery, aggravated assault, burglary, larceny, motor vehicle theft, and arson.

The 2004 crime rate of 33.8 crimes per 1,000 residents is down from 36.7 last year. Virginia Beach also maintained a low violent crime rate of 2.3 violent crimes per 1,000 residents. During 2004, total Part I Crimes decreased by nearly 7%. Violent crime increased by 3% primarily due to the 13% increase in robberies.

Homicide decreased by 33%, and aggravated assault decreased by nearly 5%. The number of property crimes fell in all categories. Burglary decreased by 16%, larceny by 6%, motor vehicle theft by 2%, and arson by 30%. The number of violent crime cases cleared increased to 63% from 54% in 2003. According to the most recent figures from the FBI's Crime in the United States 2003, the national average for cities with populations over 250,000 was 40%. The number of property crime cases cleared rose to 24% from 23% last year, well above the national average of 13%.

Chief Jacocks attributes this success in part to our active and involved citizens, the department's well-trained members, our nationally recognized Crime Solvers Program, and to our STARS (Strategic, Tactical, Analysis, and Response System) Program, which was implemented in 2004. Our STARS Program is based on the ideology of COMPSTAT and uses computerized statistics to analyze and respond to crime trends throughout the city.

Hirings/Promotions

As a testament to the growth and development of our department, 6 state-certified police officers were hired and 38 police officers successfully completed the Law Enforcement Training Academy. Additionally, due to retirements and resignations, Chief Jacocks was proud to promote 1 captain, 6 lieutenants, and 9 sergeants during 2004.

Enhancing A Culture Of Integrity

The Virginia Beach Police Department is a learning organization focused on continuous improvement and self-assessment. In 1999, we embarked on an initiative to enhance our culture and ensure that ethics and values remain strong cornerstones within the organization. Throughout this initiative, we have examined our organization internally and externally, provided training to all department members, and expanded the involvement of citizens in many of our operational activities.

In order to improve and ensure ourselves and the community that our organization continues its tradition of relying on values and ethics to make important decisions, we partnered with a respected institution of higher education and learning, the George Washington University, to evaluate our process and determine our strengths so they can be leveraged and our weaknesses so they can be improved.

While many of these factors can be examined through self-assessment alone, doing so would not provide the information we needed to help us reach our vision. Therefore, Chief Jacocks invited 125 stakeholders from a variety of areas to include: law enforcement personnel from local, state, and federal agencies; minority organizations; city and community leaders; community activities; court personnel; members of other city agencies; crime victims; and the military to participate in a Community Summit. As a result, 65 of the invitees attended the session at the Virginia Beach Law Enforcement Training Academy on November 11, 2004.

Based on the level of participation and the positive feedback received by all involved, this process was a success and allowed the department to gather valuable information from those we serve. Due to the positive reviews received by all participants, the department intends to continue this process with additional summits throughout 2005.

The Leadership Speaker's Series by subject matter experts continued during 2004. The seminars held at our Law Enforcement Training Academy centered on leadership and management-related topics such as developing a Belief System, Leadership Development Foundations, Leadership Skills and Applications, and Challenging the Organizational Culture. These sessions were available to and attended by other area law enforcement agencies.

Fifteen members of the department attended a Train the Trainer Program offered by the Museum of Tolerance, a branch of the Simon Wiesenthal Center of Los Angeles. The program is part of their Tools for Tolerance for Law Enforcement and enables officers to utilize a high-tech, interactive video program called Perspectives in Profiling. This is an experiential training program to be presented to all sworn members of the police department that moves officers into a new paradigm of thought on the subject of racial profiling.

As part of the department's ongoing leader development and growth process, two new initiatives, which will broaden the scope of learning for members of our department, were formulated in 2004 and will begin in 2005 -- The Leadership Coaching Certificate Program and a Management Skills Course.

Chaplain Program

In the summer of 1990, chaplains began walking beats at the oceanfront. Since that summer, the program has continued to expand. Today, we see our chaplains in ministry throughout the four police precincts, in training, summer operations, special events, community ministry, and as a part of our peer support network for officers in crisis. The purpose of the program is to provide a core group of professional, ordained/commissioned, or vowed men and women in religious communities from a variety of faiths who volunteer their time and talents to the City of Virginia Beach as Police Chaplains. They seek to perform tasks that have a greater spiritual or social nature rather than a law enforcement nature. They serve the needs of police officers in their personal and professional lives while serving the City of Virginia Beach at large.

In achieving these goals for the year 2004, the Virginia Beach Police Chaplains worked a total of 7,460 hours. Of this total, 602 hours were worked at the oceanfront, accounting for 110 tours of duty by our chaplains. They were called out of their homes and places of work a total of 179 times to meet the needs of our community.

MEDIA RELATIONS

Media Relations Office and Public Relations/Marketing Office

The Media Relations Office is staffed by two Media Relations Officers. MPO Rene Ball and MPO Brian Ricardo are assigned to develop an outstanding relationship with and respond to inquiries made by the Hampton Roads media. This relationship is based on trust, cooperation, and mutual interest. The Media Relations Office assists reporters in coordinating interviews, developing news documentaries, and covering events of an unusual nature. The Media Relations Officers stay abreast of the latest trends in the communications industry and provide continuing training and education for members of the police department. This office is also responsible for maintaining a current newscast library, news releases, information briefs, and a newspaper scrapbook. In addition, the office organizes, coordinates, and implements all promotion, retirement, and awards ceremonies. The office has two media trained backup officers when MPOs R. Ball and Ricardo are not available for an extended period.

The Public Relations/Marketing Office is staffed by MPO Jimmy Barnes, who also provides media coverage in the Media Relations Office. The Public Relations/Marketing Office exists to promote a positive image of the department through local media sources and publications. The office promotes police programs and services available to the citizens of Virginia Beach. MPO Barnes oversees all police news releases and public event publications on the city and police web pages.

Accomplishments

The Media Relations Office developed 217 news releases and information briefs this past year. All media releases and related photographs are transmitted electronically via E-mail. This has assisted investigators in locating wanted suspects and in the identification of victims.

The Public Relations/Marketing Office continued to establish communication dialogues with television, radio, and print media promoting police department accomplishments. The office coordinated 34 articles for publication involving officer achievements, departmental awards, and events in 2004. MPO Barnes continues to serve on many local and regional committees to include tri-chair of the city's United Way Campaign Committee, the Joint City and School Emergency Communications Plan Committee, the Emergency Response System Committee, and the American Red Cross Heroes Games Committee.

PROFESSIONAL STANDARDS

The Professional Standards Office is commanded by Captain W. S. Boswell and is staffed with five supervisors as investigators, a court liaison officer, an administrative assistant, and an office technician II.

The Professional Standards Office also manages the departmental accreditation processes. The accreditation staff includes a police lieutenant, who is the accreditation manager, and a master police officer.

The primary function of the Professional Standards Office is to maintain and, where possible, increase the integrity of the Virginia Beach Police Department and to help ensure that members of the department are providing municipal law enforcement services which are valued by our citizens.

Our efforts in this regard are accomplished by conducting full, fair, and objective investigations into allegations of misconduct on the part of members of the police department. The Professional Standards Office also provides the Chief of Police and his staff with information to evaluate the effectiveness and efficiency of the day-to-day operation of the police department. This is accomplished with observations of ongoing police operations and continual review of department policies, procedures, and practices.

Accomplishments

In 2004, the Virginia Beach Police Department's Professional Standards Office handled a total of 297 investigations involving allegations made against members of the department. Of these investigations, 150 were citizen complaints, 79 were internal investigations, and 68 were inquiries alleging misconduct. The Professional Standards Office also responded to 672 subpoena duces tecum and Freedom of Information Act requests.

PROFESSIONAL DEVELOPMENT and TRAINING

The Office of Professional Development and Training is responsible for several elements that are crucial to accomplishing the mission of the police department. One important responsibility is the recruitment and selection of the most qualified applicants for the position of police officer. In addition, the office coordinates background investigations for civilian, ancillary, and animal control personnel. The office operates the Virginia Beach Law Enforcement Training Academy (LETA), which is a Department of Criminal Justice Services (DCJS) certified police training facility, in partnership with the Virginia Beach Sheriff's Office. It provides all levels of police training, including basic recruit, in-service, and specialty classes. Professional Development and Training also coordinates the department's career development and field training programs.

Accomplishments

Professional Development and Training continued to aggressively seek and identify the best qualified candidates for police officer recruit as well as qualified applicants who are already Virginia certified officers. Additionally, a new program has been initiated in which our department now considers out-of-state certified officers on a case-by-case basis. Through our Recruitment Coordination Team and Recruiting Team, this office has utilized our officers, our best resource, as recruiting ambassadors. Our recruiting campaign also includes working closely with a local advertising agency and making visits to colleges, military installations, job fairs, and special events such as the Rock 'n' Roll Half Marathon and the Oceana Air Show.

Professional Development and Training completed two basic recruit academies in 2004, resulting in 38 new officers and an additional 4 officers hired as certified officers. During 2004, Professional Development and Training offered 54 separate courses through a cooperative effort with other organizations and agencies. Classes such as "Managing Employee Discipline," "Understanding and Conducting Security Assessments," and "Patrol Officer and Terrorism" all enhanced the ability of local law enforcement to be prepared in any type of situation.

A coordinated effort between staff in Professional Development and Training and certified instructors within the department presented training in Automatic External Defibrillator (AED) to 810 sworn personnel and 265 civilian employees. An E-Learning class pertaining to the critical issue of workplace harassment was begun in 2004 and will be completed in March 2005. Over 1,000 sworn and non-sworn employees will have received this training.

The department continued to upgrade the leadership development program by offering the West Point Leadership Course. The fourth class graduated in December 2004. Also presented this past year were several noted experts in the study of leadership who were invited to be part of the department's "Leadership Speaker's Series." This series was open to all supervisors and officers currently on promotional lists within the department. The series was also open to surrounding police jurisdictions.

Professional Development and Training continued to enhance its firearms training program in 2004. The range staff presented 8 weeks of basic academy firearms instruction, coordinated the successful transition of our department to the Glock handgun, and provided firearms and tactical firearms training to over 600 police officers, animal control officers, and fire investigators. Additionally, the range staff held 19 firearms qualification classes, 34 in-service firearm instructional classes, and coordinated 32 Sage/Rapid Response/Crowd Management classes.

In 2004, after the purchase of 40 Bushmaster carbines, Professional Development and Training's range staff developed and began instructing a 40-hour Patrol Rifle Program. This program is to be followed by quarterly training.

Our department continues its commitment to our citizens of all ages by conducting our Citizens and Youth Academies several times during the year.

OPERATIONS DIVISION

Deputy Chief J.A. Cervera serves as the commander for the Operations Division. This division houses the four police precincts, Special Operations, Animal Control, Command Duty Office and Crime Prevention. The vision of the Operations Division has been to enhance the quality of life for all citizens by providing valuable crime prevention and crime reduction services. By leveraging our two most important resources, the dedicated men and women of our police department and our community partnerships, Virginia Beach has remained one of the safest major cities in the country. Through leadership, moral courage and commitment to our citizens, we will continue the pursuit of our core mission.

Accomplishments

The STARS Program - The department completed implementation the Strategic Tactical Analysis and Response System (STARS) during 2004. The STARS Program integrates interactive crime analysis with command responsibility and accountability to strategically respond to emerging crime trends. The four cornerstones of STARS: the immediate analysis of crime data, the emphasis on the immediate responses to the identified emerging crime trends, follow-up and assessment of strategies and the integration into our community policing initiatives have resulted in a successful first year for the program.

Monthly, all captains and their key staff members meet and present the crime issues and responses in their respective precincts and bureaus. With the use of interactive computer-generated crime mapping, identifiable trends are correlated with response strategies and community awareness plans. Through the implementation of the STARS Program, the Operations Division and the Investigative Division have combined resources into a seamless strategy to reduce crime and increase case clearances.

Emergency Response System – In 2004 the police department became an integral component to the city's Emergency Response System with the introduction of Automatic External Defibrillators (AEDs). Through an initial capital outlay of \$250,000, all primary and secondary zone units as well as select specialized cars were outfitted with AED technology. Response systems are now in place to notify and dispatch police officers to assist heart attack victims. This innovative program will decrease the response time for critical emergency care to cardiac patients and enhance the capabilities of the Emergency Response System.

Community Policing – The Virginia Beach Police Department remains committed to the community policing philosophy of working with our citizens to identify and solve community problems. In 2004, community surveys were conducted in a number of neighborhoods to gauge citizen priorities to crime issues. Each precinct has dedicated officers assigned to various communities, and strategies were implemented to solve these various community problems.

SUPERVISORS & ANALYSTS
AT MONTHLY S.T.A.R.S. (COMPSTAT)

COMMAND DUTY OFFICERS

Captain H.T. Carr

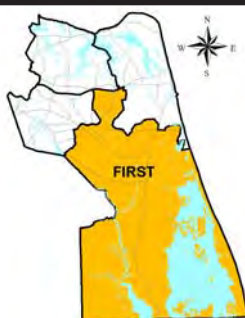

Captain K.M. Lowe

Captain M.J. Glendon

Command Duty Captains are an integral part of the Operations Division. On weekends, holidays, and after normal working hours, Command Duty Captains provide command of routine departmental operations, immediate command level oversight of critical incidents, SWAT operations, vehicle pursuits, hostage and barricaded subject incidents, and incidents that involve more than one precinct or bureau. The Command Duty Captains also add continuity to communications between line and administrative staff during nights and weekends. This allows immediate concerns to be brought to the attention of command staff and enables immediate response from the command staff when needed. This communication is vital for efficient operations and the commitment of all personnel to the department's mission and goals.

Captain W.W. Baker

**FIRST PRECINCT**

The First Precinct is located in the southern region of the city and serves about 110,000 residents in a land area of approximately 195 square miles. The First Precinct includes the transition area between the traditional suburban northern portions of the city and the primarily agricultural southern portion of the city. The First Precinct strives to meet the unique challenges of policing areas of rapid growth. Increasing numbers of new subdivisions, aging suburban communities, and areas of large existing commercial enterprise such as the Verizon Wireless Virginia Beach Amphitheater, Lynnhaven Mall, and the SportsPlex are all areas of challenge. Areas of rural quaintness such as the rural communities of Creeds, Back Bay, Pungo, and our growing resort area such as the Sandbridge community, present additional challenges.

Additionally, the First Precinct provides services to the Municipal Center, the city's central hub of government. The city's rapidly expanding educational complex on Princess Anne Road involving Tidewater Community College, Old Dominion, and Norfolk State Universities has required an expansion of the First Precinct's responsibility in providing security and services to ensure a safe educational environment.

Accomplishments

The First Precinct's Community Oriented Policing Services Unit continues to exercise its responsibilities in stressed neighborhoods using traditional patrol efforts as well as tactical innovations designed to involve citizens in the maintenance of their communities. In this spirit, the COPS Unit initiated the first drug blight process in the city's history in a successful effort to rid a neighborhood of a persistent narcotic problem property.

The precinct's Crime Analyst Unit, comprised of two officers and a civilian volunteer, has performed superbly spearheading the effort to more effectively meld crime analysis data with rapid tactical and investigative responses. This will address known crime issues and preclude minor crime problems from becoming major concerns.

Much of the progress made in 2004 can be attributed to the diligent and competent work efforts of our officers and staff. Credit may also be given to the First Precinct's Citizens' Advisory Committee for the crucial support they provide. This close working relationship ensures that lines of communication between the First Precinct and the citizens we serve remain open.

SECOND PRECINCT

The Second Precinct and its 24th Street Substation are responsible for providing police services and protection to approximately 81,000 full-time residents and nearly 3 million summer visitors each year. The majority of the hotels that make up this large resort city are part of the Second Precinct. The 48 square miles that constitute the area of this precinct include about 11 miles of Atlantic Ocean coastline and 5 miles of Chesapeake Bay coastline. The original town of Virginia Beach is included within the precinct's borders.

Due to its unique nature that combines residential, business, military, light industry, and tourist areas, the precinct is patrolled by traditional police patrol, bicycle, ATV, motorcycle, and mounted units.

Accomplishments

The initiative of awareness to the hotel and motel community that was started back in December of 2003 continued in 2004. This program is in partnership with the Hotel/Motel Association. This is an ongoing program to provide enhanced police and investigative services unique to the motel industry.

Entering in a partnership with the NAACP, Atlantis Apartment Management, local churches, and the residents of Atlantis Apartments, Community Policing Officers established a working organization to enhance the livability of this community. The initiative seized the opportunity to improve the neighborhood when the managers of Atlantis Apartment began extensive renovations to the complex.

In a continued effort to evolve community policing as a philosophy, the organization of the command was restructured in the fall of 2004. The restructuring decentralizes community policing and places a supervisor responsible for community policing initiatives on each of the three shifts. This supervisor is directly responsible for these initiatives. To date, the most successful of these initiatives is the day shift working with residents of Trailer City. The officers have formed a partnership with the residents of this community to improve the conditions in the trailer park by a variety of proven strategies.

Community policing has also been established at the oceanfront. Twenty-five officers were funded by a federal grant to provide police services as part of a community policing project at the oceanfront. The unit is being established in phases with the first nine officers and one supervisor who began their duties in the fall of 2004. These officers seek to form partnerships with restaurant and motel owners to solve problems within the philosophy of community policing.

THIRD PRECINCT

The Third Precinct is located in the northwestern section of the city. Geographically, the precinct encompasses 36 square miles with a residential population of about 104,000. Housing in the area consists of both single-family and multi-family dwellings. The precinct has a large concentration of retail businesses along the major thoroughfares with light manufacturing industry in the Airport Industrial Park area. The Town Center business development continues to grow with several new additions of various retail establishments.

City of Virginia Beach Town Center

Accomplishments

The Third Precinct moved into a new facility in June of 2004. The new facility is located directly behind the old precinct building, which had housed the police staff for over 30 years. The new facility better accommodates the staff and enables us to continue to provide the best police services to our citizens.

The Third Precinct continues to expand our community policing efforts and increase the interaction between the police and our residents. We presently have 30 officers working directly with our civic groups. This should serve to improve upon an already strong and successful Citizens' Advisory Committee within the Third Precinct district.

The Third Precinct continues to provide quality police services to the members of our communities. This is accomplished using multiple strategies along with an increasing effort of cooperation with the citizens of our communities. The combined efforts of the police and citizens of our communities brought about a significant decrease in serious crime again this year. The Third Precinct makes continuous efforts in keeping our city a safe place to live, work, and play.

FOURTH PRECINCT

The Fourth Precinct, located in the heart of Kempsville, encompasses the area south of I-264 and west of Rosemont Road. The precinct shares its borders with the cities of Norfolk and Chesapeake. The precinct is 31 square miles and has a population of approximately 140,000 residents. Historically, growth has been steady; however, development increased significantly in 2004 with the addition of approximately 2,700 residences in 4 major housing developments.

Accomplishments

The Fourth Precinct continued its commitment to school safety through the School Resource Officer Program and our Juvenile Crime Suppression Unit. The Fourth Precinct's nine School Resource Officers (SRO) work in partnership with the school officials at four high schools, four middle schools, and the Open Campus. In addition, each SRO provides support to the 19 elementary schools within the precinct. The Juvenile Crime Suppression Unit Program further strengthens our partnership with the schools. This unit seeks out and identifies at-risk youth during school hours by monitoring locations where youth congregate. This allows the unit members to identify and return truants to school, which reduces the potential for juvenile crime.

The Recreation Center Officer Program is in the second year of a pilot program. This partnership with the Department of Parks and Recreation allows for one officer to be assigned to middle school children participating in the At-Risk Children's Program at the Kempsville Recreation Center. The officer serves as a coach and mentor, teaches alternatives to drugs and violence, and assists the children in making positive choices in their family, school, and neighborhood.

The Fourth Precinct remains committed to our community policing initiatives. In 2004, The Fourth Precinct Community Oriented Policing Services Unit (COPS) continued to identify and implement innovative strategies to address ongoing criminal and traffic issues within the precinct. The unit worked in partnership with our crime analysts, other agencies, and the community to effectively address the issues through the coordination of numerous planned patrols and selective enforcement actions. Realizing the importance of citizen input, residents of our target neighborhoods were surveyed. This information allowed us to improve our service delivery as well as establish a higher level of citizen safety and comfort.

The Fourth Precinct Citizens' Advisory Committee (CAC) continued to be an active and effective community liaison organization and was one of the driving forces behind the overall success of the Fourth Precinct in 2004. The committee actively supported our mission and our officers by sponsoring the 2004 Fourth Precinct Appreciation Picnic and the Adopt-a-Muster Program. In addition, they provided support to the Police Unity Tour and volunteered at major events such as the July 4th program at Mount Trashmore.

The Fourth Precinct developed a partnership with the security administrators at Regent University during 2004. The formation of this partnership allows us to improve our relationship with Regent University, which is a major employer within the City of Virginia Beach. The safety and security of the students and staff at Regent have a tremendous impact on the overall operations of the precinct. Additionally, numerous training and developmental opportunities have been made available for our officers.

SPECIAL OPERATIONS

Special Operations, commanded by Captain R. V. Eisenberg, supports the Operations and Investigative Divisions by providing specialized patrol techniques and tactics. Special Operations personnel receive specialized training and have responsibilities in the following areas: Aviation, Bombs, Canine, Diving, Fatal Crash Investigation, Hit and Run, Marine Patrol, Motor Carrier Safety, Mounted Patrol, Motorcycles, Selective Enforcement, Special Weapons and Tactics, Parking Enforcement Specialists, PhotoSafe, and School Crossing Direction.

Unit Descriptions and Accomplishments

AVIATION UNIT – AIRPLANE OPERATIONS: In 2004, the Aviation Unit utilized leased aircraft to support the Prisoner Extradition Program for the City of Virginia Beach and surrounding jurisdictions. This unit consisted of a sworn police officer/pilot from the police department and one sworn deputy/pilot from the Sheriff's Department working in conjunction with officers from Special Operations and other commands who volunteer to conduct these prisoner transports. The use of the Helicopter Unit added an additional resource for conducting short-range extraditions. In 2004, this unit completed 49 commercial flights, 99 charter flights, 29 vehicle trips, and 2 helicopter flights which culminated in transporting 264 inmates for the City of Virginia Beach and surrounding jurisdictions at a cost savings of approximately \$50,000.

AVIATION UNIT – HELICOPTER OPERATIONS: The department operates 2 Bell 206BIII Jet Ranger helicopters with 6 pilots and 14 volunteer flight officers. Utilizing specialized equipment such as forward looking infrared (FLIR), 30,000,000 candlepower searchlights, GPS street mapping, and a water rescue ring, the Helicopter Unit flew 956 accident-free hours and responded to 939 police calls for service in 2004. The Helicopter Unit assisted on 47 felony and 61 misdemeanor arrests, responded to 4 swimmers and 12 boats in distress, 10 vehicle and 52 foot pursuits, 139 burglaries, and 108 robberies. The unit is an active member of Project Lifesaver and instructs other departments on how to use this equipment to find lost or missing individuals who are wearing the Project Lifesaver devices. In addition to supporting law enforcement, the Helicopter Unit provided aerial services to a number of city departments including City Council, City Manager's Office, Convention and Visitor Development, Economic Development, Coastal Management, Fire, Rescue, and Public Utilities. Finally, the Helicopter Unit provided an aerial asset for homeland security issues in the Tidewater area.

BOMB SQUAD: Officers serving on the Bomb Squad are trained and certified by the FBI as "Hazardous Devices Technicians." These highly trained explosives experts are responsible for the evaluation and safe resolution of incidents involving suspicious packages, improvised explosive devices, recovery of conventional explosives and unexploded military ordnance. During 2004, the Bomb Squad assisted the Department of Homeland Security (DHS) in assessing the vulnerability of several critical infrastructure assets and developed Buffer Zone Protection Plans in an effort to combat terrorism. Additionally, through DHS grant funding, the Bomb Squad purchased a new MR-5 Hazardous Duty Robot. The robot is housed and transported in a custom built 2004 International heavy-duty truck that also features a Total Containment Vessel (TCV) used to transport dangerous devices. The Bomb Squad replaced its aging protective bomb suit with a new Med Eng EOD-8 bomb suit and added a grant-funded infrared pole camera to its inventory of specialty equipment.

CANINE UNIT: The Canine Unit is staffed with 1 sergeant and 15 officers. Fifteen of the canine teams are trained in patrol work and one team specializes in explosive detection. In an effort to increase the availability of explosive dog teams we have cross-trained four patrol dog teams in explosive detection. The Canine Unit maintains a schedule that provides 24-hours, 7 day a week street coverage. The Canine Unit also responds to SWAT operations to assist with security and containment. Two of the unit's members are certified trainers with the Virginia Police Work Dog Association and conduct in-house canine training. Each canine team is certified with the Virginia Police Work Dog Association and the North American Police Work Dog Association. In 2004, the Canine Unit responded to over 8,430 calls for service, was involved in 853 misdemeanor and felony arrests, conducted 448 building searches, plus 1,430 area searches and tracks. Canine teams were utilized in over 2,404 criminal investigations.

DIVE UNIT: The Dive Team comes under the supervision of the Marine Patrol Unit. Members are tasked with the search, recovery, and documentation of all evidence and lost property in the waters controlled by the City of Virginia Beach. The unit continues to grow in operational preparedness, certifying members as Public Safety Divers in the search for underwater explosive devices and as Underwater Crime Scene Investigators. Members work closely with the U.S. Coast Guard, Norfolk, and Chesapeake Marine and Dive Units. In 2004, the unit made 36 work-related dives, to include the recovery of firearms, vehicles, coin machines, and conducted searches for underwater explosive devices, bodies, and other evidence of criminal activities.

FaCT UNIT: The Fatal Crash Team consists of one sergeant and eight officers who are highly trained in accident investigation and reconstruction. The members of this team respond to all fatal and serious injury crashes, collisions involving police vehicles where injuries occur, and any collision that may be complex in nature. These officers complete an often time-consuming, detailed investigation of every collision they handle. Their investigation is regularly assisted by department-purchased, state-of-the-art scientific equipment. The officers utilize a forensic mapping system that enables them to create a detailed precise scale diagram of each collision scene. The team then uses this information to analyze the location of each fatality to determine what if anything can be done to prevent a tragedy from occurring again. These officers also assist in teaching other officers throughout the police department on various areas related to traffic safety. Because of their expertise and training, these officers are often called upon by patrol officers to assist them on traffic related matters.

HIT AND RUN: Two detectives are assigned to work all departmental cases of hit and run when the initial police report warrants follow-up investigation. Hit and Run detectives closed more than 800 cases in 2004; 35% of the incidents resulted with an arrest, the offenders being identified but the victim declining prosecution, or property damage restitution being facilitated by the detectives.

MARINE UNIT: The Marine Patrol Unit consists of eight full-time officers and one sergeant. Members enforce rules and regulations relative to marine equipment, boat operation, and water usage. Officers investigate recreational boating accidents, including fatalities, and assist the U.S. Coast Guard with security for the Port of Hampton Roads. Officers conduct searches for drowned or missing persons, recovery of lost or stolen boats or property, and assist boaters in distress. The 8-man unit spent over 2,600 hours underway patrolling the over 200 miles of waterways, beaches, and inlets in Virginia Beach in 2004 and answered over 3,700 calls for service. Members have established a close working relationship with the U.S. Coast Guard, U.S. Customs, and other local agencies. Unit members represent the department on two nationally mandated committees regulated by the Department of Homeland Security, the Port Security Task Force and the Port Threat Assessment Committee. The unit continues to increase its operational preparedness levels with the purchase and implementation of new equipment and training techniques. In 2004, two new vessels were added to the fleet that greatly increased the unit's capability to respond to emergencies faster and under more severe weather conditions. Members of the unit are now certified Marine Captains under the U.S. Coast Guard.

MOTOR CARRIER SAFETY UNIT/ENVIRONMENTAL CRIMES: The Motor Carrier Safety Unit conducts roadside inspections of commercial motor vehicles to locate and enforce equipment defects, logbook violations, hauling permit violations, and hazardous material violations. In 2004, there were 46 overweight citations issued with a total assessment of \$246,891 in liquidated damages. Officers conducted 94 commercial vehicle inspections resulting in 49 vehicles being placed out of service for safety violations. The unit responded to six environmental crimes cases and handled one hazardous materials incident. The unit assisted in putting into place regional hauling regulations now adopted by the Cities of Virginia Beach, Chesapeake, and Portsmouth. This unit conducted safety demonstrations and provided safety lectures and training to our police academy and other local police/sheriff's departments (Portsmouth and Chesapeake). The unit also trained and tested over 120 drivers for state escort driver certification. One of the unit's officers is the chair for the law enforcement section of the Military Civilian Transportation Safety Workshop that is held annually at Fort Eustis. This workshop brings together experts and leaders to discuss mutual concerns, exchange important data, pool resources, and develop workable solutions to difficult transportation safety interests that include highway, water, air, mass transit, and rail safety.

MOUNTED PATROL UNIT: The Mounted Patrol Unit is staffed by 1 sergeant, 13 officers and 2 animal caretakers. The unit is responsible for covering a wide variety of assignments throughout the city and the Second Precinct oceanfront operation from April through September. The Mounted Patrol Unit was responsible for making over 735 misdemeanor arrests, 6 felony arrests, and 275 traffic summonses during their assignment to the beachfront. The unit is an integral part of the oceanfront operation providing enforcement efforts and crowd management tactics. The unit completed 75 special assignments, worked 30 football games, and conducted over 200 hours of training during 2004.

MOTORCYCLE UNIT: The six-officer Motorcycle Unit's primary mission is the reduction of traffic-related incidents and deaths within the City of Virginia Beach through aggressive speed limit enforcement. Members handle various traffic-related calls for service including motor vehicle accidents, disabled vehicles, funeral escorts, parades, races, dignitary protection escorts, and assorted special events. Officers issued over 6,000 citations for traffic offenses, answered over 970 calls for service, conducted over 250 escorts, and investigated 220 accidents in 2004. Assigned officers represent the city at functions across the state and region such as the 2004 Unity Tour from Virginia Beach to Washington, D.C. Members of the unit also won recognition in two Motorcycle Safety Competitions, one held locally and one held in Fairfax County.

SELECTIVE ENFORCEMENT TEAM: The Selective Enforcement Team (SET) is comprised of one sergeant and eight officers. These officers are scheduled to work during the hours when the majority of impaired drivers are traveling on the roadways. The mission of SET is the reduction and prevention of alcohol-related accidents through enforcement and education. During 2004, SET officers conducted over 30 safety lectures that were attended by over 5,400 personnel. They issued over 7,100 traffic summonses and arrested 662 DUI violators. In 2004, the SET officers were recognized by the Southside Chapter of MADD for their efforts in detecting and apprehending impaired drivers. In addition to their regular duties, SET officers also assisted with the "Arrive Safe Virginia Beach" video and produced a DUI Procedure Manual for the department.

SWAT TEAM: The Special Weapons and Tactics Team consist of 1 lieutenant, 2 sergeants, and 17 officers. The SWAT Team responds to incidents involving hostage situations, service of search and arrest warrants, barricaded suspects, and suicidal subjects who may pose unique safety concerns for patrol personnel. The SWAT Team responded to 66 incidents in 2004.

The SWAT Team also works in conjunction with the Warrant Squad to locate and apprehend fugitives throughout the city. SWAT officers also accompany the Aviation Unit to extradite violent criminals back to Virginia Beach for court proceedings.

Training is a major component of the SWAT Team. This includes team training and sniper training. SWAT officers are certified in less-lethal weapon systems, crowd management tactics, specialized weapons, dignitary protection, and counter-terrorism. SWAT officers spent hundreds of hours last year teaching basic academy and in-service classes to the entire department. The focus is on patrol tactics, critical incident management, and officer safety issues.

The SWAT Team has worked closely with federal, state, and local agencies in an effort to promote regional co-operation and maximum efficiency of the assets available that were seen as vital necessities for first responders when dealing with terrorist attacks in our region. In 2004, the SWAT Team participated in several joint training. In May 2004, the VBPB SWAT Team hosted the first World SWAT Challenge and Competition held at the Blackwater Training Lodge. SWAT Teams from all over the world trained and competed for five days. This event was televised nationally on ESPN.

PHOTOSafe: In 2004, the Virginia Beach Photo Red Light Enforcement Program (PHOTOSafe) officers worked diligently on all the various aspects of implementing this traffic safety program. Site selection began shortly after the awarding of the contract and construction began on August 28, 2004, at the first intersection of Holland and Rosemont Roads. That intersection went live September 11, 2004. The next two intersections, Independence and Virginia Beach Boulevards and Kempsville and Indian River Roads, were completed by the end of the year.

Ongoing public education workshops and presentations were conducted for various citizen groups and organizations. In addition to meeting with the citizens, the program's message was hailed to the general public through the media, brochures, the Internet, and water billing inserts. The program was honored with the coveted "John T. Hanna Traffic Safety Award" for Outstanding Achievement in Enforcement Initiatives. A citizens' survey conducted and finalized in November showed that 84% of the citizens of Virginia Beach approved of the program.

The program is staffed by one full-time officer and one sergeant. In 2004, the unit processed 8,142 incidents. From those incidents, 3,029 warning letters and 2,780 notices of violation were sent to the registered owners. Since the cameras have been active, each intersection has seen a decrease in the number of incidents captured. This decrease in incidents has translated into a decreased number of crashes caused by red light runners.

OTHER CONTRIBUTIONS: Special Operations hosted the department's 5th Annual Mid-Atlantic DUI Conference held at the Virginia Beach Pavilion Convention Center. Over 275 police officers, prosecutors, and judges representing 9 different states and over 75 different agencies from the entire Mid-Atlantic region attended the conference. The corporate sponsorship by Anheuser Busch Corporation, St. Louis, Missouri, provided the funding that enabled the department to offer this conference at minimal cost to participants. Mayor Meyera Oberndorf, Senator Ken Stolle, Attorney General Jerry Kilgore, Congressman Ed Schrock, and Chief Jacocks provided remarks to the attendees. Several officers from Charleston, South Carolina, attended the conference compliments of the sponsors as an expression of our community's gratitude for that department's help during Hurricane Isabel in the fall of 2003. We also partnered with a local Outback Restaurant to host a dinner honoring the attendees at our local FOP lodge.

Special Operations takes great pride in educating the police department and our citizens in traffic-related matters. This year this training was accomplished with several unique and interesting projects. The "Starr Report" is published quarterly and distributed to every police officer. This traffic safety newsletter discusses current events and trends in traffic safety matters. It is also used to commend officers that perform above and beyond in the traffic safety area. It is named in memory of Auxiliary Police Officer George Starr who was killed by a drunk driver in 1991. Special Operations also published and distributed a "DUI Field Guide" to the entire department. This guide is designed as a step-by-step procedural manual to walk an officer through an entire DUI arrest. It also covers several different types of unique and often difficult situations involved in DUI arrests. Special Operations also developed a video entitled "Arrive Safe Virginia Beach." The 19-minute tape involved different facets to educate drivers about the dangers on our roadways. The highlight of the tape is a commentary by a convicted drunk driver that killed two people. The tape, and specifically this segment, has moved viewers to tears.

CRIME PREVENTION

Crime Prevention is an innovative unit designed to reduce crime through education of all age and geographic groups through various programs including Neighborhood Watch, TRIAD/S.A.L.T., rape risk reduction, home/business/church security assessments, juvenile/adult personal safety, school safety audits, Crime Prevention Through Environmental Design (CPTED), holiday safety, Auxiliary Police, and Explorer Post 911. They also coordinate educational programs such as "Options, Choices and Consequences" and the "Every 15 Minutes" Program. The Citizens' Police Academy and Senior Citizens' Police Academy are also assigned responsibilities of the Crime Prevention Unit.

Accomplishments

Members of the Crime Prevention Unit were awarded a DCJS grant entitled "Operation Lookout Expanded." The purpose of "Operation Lookout Expanded" is to make senior citizens feel safe in their homes and to make them aware of ways to improve the security in their homes. The grant did this by installing a large-view peephole in the front door, new locks on some doors, and conducting security assessments of the senior's home.

The first regional Auxiliary Police Academy was held in Chesapeake. Virginia Beach graduated four auxiliary officers from this academy and received the top three awards. The second regional Auxiliary Police Academy will be held in Virginia Beach in the spring of 2005.

Auxiliary Police provided a cost savings to the city of \$113,608 by serving a total of 5,164 hours. During 2004, auxiliary members answered 609 calls for service. The Auxiliary Police had a total of 16 members.

ANIMAL CONTROL

Superintendent Wayne P. Gilbert, II, commands the Bureau of Animal Control. The primary responsibility of the Bureau of Animal Control is the enforcement of state domestic animal laws and animal-related city ordinances. The Bureau also takes an active role in the community through educational and volunteer programs and by placing homeless animals into new homes.

Besides the superintendent, the bureau's workforce consists of 2 animal control supervisors, 1 administrative assistant, 2 clerks, 21 animal control officers, 6 caretakers, and a number of volunteers. The office and kennel are open to the public for visits, adoptions, reclaiming, and business 7 days a week (0900 to 1700 hours weekdays and 0900 to 1500 on weekends). Animal Control Officers are on patrol daily from 0630 to 2400 hours, and an officer is available on callback duty during the overnight hours.

Accomplishments

In July of 2004, the bureau introduced the "Bureau Orders Book," the first set of modern standard operating procedures in over 20 years. This book was completed in just ten months by a dedicated group of Animal Control employees. Now the bureau has new operating procedures that outline what is expected of each employee as they carry out their duties.

Since April of 2003, a group of Animal Control employees, along with members of Occupational Health and Risk Management, have worked diligently to find ways to make working conditions at Animal Control safer. The committee has worked hard to find safety solutions, and employees have become more safety conscious making the bureau a much safer place to work. Since this committee began, on-the-job injury claims have dropped by over \$200,000.

In November of 2004, Superintendent Gilbert, along with other animal control and animal welfare agency administrators, announced the formation of T-PAWS (Tidewater Partnership for Animal Welfare and Sheltering). This group will find ways for the shelters and pounds in this area to work closer together with space sharing, education, and promoting adoptions of shelter animals.

During 2004, the bureau began its volunteer programs with the Juvenile Program and is showing signs of success. A group of Animal Control Officers oversee the juvenile volunteers. The teens have been doing a great job taking care of the animals and assisting members of the public when they visit the shelter.

Animal Control Statistics

Dispatched calls:	31,642	Dogs transferred to animal rescues:	127
Stray dogs and cats picked up:	6,181	Cats transferred to animal rescues:	222
Dogs and cats turned in by their owners:	767	Animals transferred to the VBSPCA:	84
Deceased animals processed:	6,494	Dogs and cats euthanized:	3,013
Dogs and cats returned to the owner:	2,246	Animal bite reports:	1,280
Dogs and cats adopted:	1,023	Summonses issued:	649

INVESTIGATIVE DIVISION

Deputy Chief G. G. Mullen serves as commander of the Investigative Division that houses the two primary investigative squads in the police department. Special Investigations is commanded by Captain D. T. McGrattan, and the Detective Bureau is commanded by Captain J.L. Bell. Chief Mullen's focus for the division is leadership, quality customer service, and community partnerships. Through these priorities, the division has been successful at responding to community needs and helping Virginia Beach remain the safest city its size in the country. Through initiatives like Gang Awareness, Sequential Line-ups, Cold Case Volunteers, and an enhanced focus on Computer Crimes involving sexual predators and personal identify fraud, the Investigative Division remains proactive in its efforts to stay ahead of crime trends. The driving commitment for the men and women of the Investigative Division is to prevent crime and victimization where possible and ensure justice in those cases where offenses occur.

Captain J.L. Bell

DETECTIVE BUREAU

The Detective Bureau provides superior investigative service and administrative support to all customers in order to enhance the quality of life for citizens and visitors, reduce the impact and fear that is created by crime, and thereby strengthen the economic vitality of Virginia Beach. We accomplish this mission through identifying, selecting, and training quality personnel who conduct prompt, diligent, and professional criminal investigations. Our personnel maximize the use of all available human, material, and technological resources and focus on the recognition, collection, and preservation of physical evidence. This mission is achieved through investigations by the Domestic Violence Unit, Economic Crime Unit, Property Crime Unit, Special Victim's Unit, Crime Analysis Unit, Pawn Unit, Crime Solvers, Auto Theft Unit, Homicide Unit, Robbery Squad, Forensic Services Unit, and Warrants.

Accomplishments

The Domestic Violence Unit received a continuation of V-STOP grant funding for a domestic violence investigator position. The total grant awarded of \$63,298 enhances a working partnership with the Samaritan House (a shelter for battered women) to ensure the safety of victims. In addition to the dedicated investigator, the funds cover the purchase of two digital cameras and training for the Domestic Violence Unit.

Warrant/Fugitive Unit initiated the Top Ten Program designed to apprehend wanted persons that have the most outstanding number of arrest warrants. The unit simultaneously initiated the Operation Spring Cleaning Program that was designed to arrest persons with outstanding violent felony warrants. These programs resulted in the apprehension of 62 persons in 2004, resulting in the service of 470 outstanding warrants. Of these warrants, 216 were for felony offenses and 254 were for misdemeanors.

The Domestic Violence Unit entered into a collaborative effort with the Office of the Commonwealth's Attorney and the Samaritan House. As a result of these efforts, the police department was awarded approximately \$125,000, under a Department of Justice funded grant (The Arrest Grant), for the service and enforcement of domestic violence protective orders.

The Crime Analysis Unit continued to gather, coordinate, and present to police administrators information for the Strategic Tactical Analysis and Response System (STARS) Program. The STARS Program was recognized as contributing factor to the City of Virginia Beach crime rate decrease for the fourth consecutive year.

The Pawn Unit acquired an additional detective and a part-time civilian clerk to enter the hundreds of transactions that are reported to the unit daily. These resources have enhanced the unit's ability to investigate criminal cases associated with pawn/second hand shops and pawnshop enforcement. The unit has successfully cleared over 50 criminal cases while still maintaining strict enforcement of the pawn/second hand codes.

The Detective Bureau initiated a Cold Case Volunteer Program. The purpose of this program is to seek professional analysis and reviews of cold case homicide files. These files have been thoroughly investigated by a Homicide detective and reviewed by the Cold Case detective. All investigative leads and analysis of evidence have been completed without a satisfactory conclusion to the case. A request for volunteers produced over 180 applications. Fifteen individuals from diverse backgrounds in law enforcement, medicine, and psychology were selected. Volunteers will be provided with a copy of the case file to review. After the review, the department's Cold Case Unit will meet with the volunteers to discuss the findings. The first cold case review is scheduled in March 2005. This program is one of the few in the country, and it is hoped that additional review of the case may lead to identification of additional witnesses or suspects.

Reported auto thefts for 2004 experienced a decline of by 5.9% as compared to 2003. Unauthorized use of auto reports declined 12.1 % as compared to 2003.

Forensic Services Unit Statistics

*Video services start date June 2004

CRIME SOLVERS

Crime Solvers, which started in 1982, is a partnership between the police department, a civilian board of directors, and the media. Rewards are paid for tips that lead to the arrest of persons responsible for various crimes as well as for the seizure of drugs and stolen property. No taxpayer money is used for these rewards. The Crime Solvers Unit owes its success in large part to the dedicated and energetic citizens who make up the Crime Solvers Board.

Accomplishments

The Crime Solvers Unit processed 1,225 tips, which resulted in 121 arrests, 311 charges being filed, \$66,610 worth of property being recovered, and \$215,911 worth of drugs being seized. The unit paid out awards totaling \$21,980.

Detectives in the Crimes Solver Unit initiated a program to help promote the Crime Solvers Program and increase the facilitation of tipster information. These detectives responded to crime scenes to help conduct witness interview canvasses, distributed wanted information flyers, and are using real estate type signs to solicit tipster information at cold case crime scenes. The Crime Solvers Program experienced an increase of 29% in criminal tips and a 28% increase in the value of recovered stolen property as compared to the previous year.

The Crime Solvers Program won the 2004 Southeastern Crime Stoppers Association Productivity Award for jurisdictional populations of 400,000-499,999. The award is given to the program that has received the most number of tips, made the most arrests, and cleared the most cases.

The Crime Solvers Internet web site, <http://www.crimesolvers.com/>, which is run jointly by Crimes Solvers Unit detectives and the Crime Solvers Board, experienced triple the number of web site visits for information on wanted persons and for information in helping to solve crimes. Volunteers have been posting information on wanted suspects and recent crimes to facilitate tipster information for detectives to investigate.

The Crimes Solvers Unit has worked closely with the Crime Solvers Board of Directors on 3 major fundraisers to acquire approximately \$34,000 in donations to help pay for rewards.

SPECIAL INVESTIGATIONS

Special Investigations is responsible for investigating crimes involving narcotics, vice, gangs, the diversion of prescription drugs, computer crimes, and organized criminal activities in the city. The unit is also responsible for the collection, maintenance, use, and dissemination of criminal intelligence data. This information is provided to other units within the police department, as well as local, state and federal agencies. Special Investigations also participates in area-wide task force operations that involve federal, state, and local departments in order to better investigate multi-jurisdictional crimes.

The Criminal Intelligence Unit (CIU) serves to collect, analyze, and disseminate intelligence to support the department. Detectives in CIU liaison with and provide assistance to state and federal agencies on cases which impact our city.

The Drug Diversion Unit investigates the illegal possession, sale, and distribution of prescription drugs by citizens and medical professionals.

The Narcotics Interdiction Unit detectives concentrate on hotels/motels and transportation methods utilized to transport illicit substances to and from Virginia Beach. The unit also has two narcotics detection teams consisting of dogs and handlers. These teams handle all requests for narcotics detection in the city and assist other local, state, and federal agencies.

The Vice Squad is responsible for the investigation of street level narcotics violations, illegal sports bookmaking and gambling operations, prostitution and sexual solicitation cases, ABC violations, copyright violations, and the illegal sale of drug paraphernalia. In addition, the Vice Squad is assigned to work with the First Precinct on drug-related crimes in an effort to enhance communications and facilitate a partnership between commands.

The Criminal Crimes Unit (CCU) is responsible for conducting online investigations and recovering computer evidence from seized computer systems. The main focus of online investigations is to prevent the sexual exploitation of children on the Internet. The CCU is also responsible for providing specialized computer training to officers and detectives, teaching them how to use the computer as an investigative tool. The CCU also educates parents and children of our community on the dangers of the Internet.

The Special Investigations Narcotics Squad actively investigates self-initiated and reported drug cases that can range from short-term investigations to long-term, complex conspiracy investigations. In addition, each squad is assigned to work with the Second, Third, and Fourth Precincts, thereby enhancing communications and facilitating a partnership and further cooperation between commands.

Accomplishments

Special Investigations (SI) is a member of the FBI Norfolk Joint Terrorism Task Force, the DEA Norfolk Task Force, and the ATF Norfolk Task Force. SI provides four full-time task force detectives to supplement these federal agencies in the investigation of terrorism, drug, and weapons-related cases that have any connection to our city. These detectives also serve as a conduit providing our department with timely international and national intelligence that may impact our community.

To effectively impact youth crime, agency teamwork and practices of prevention and intervention are paramount. The Special Investigations Criminal Intelligence Unit and Narcotics Detection Teams continue to work closely with our School Resource Officers and the Virginia Beach School Administration to ensure a safe environment in our schools.

In 2004, the Criminal Intelligence Unit sent two members to attend the 7th Annual Training Conference of the National Gang Crime Research Center (NGCRC) in Chicago. NGCRC is a nationally recognized gang investigators conference which provides training and certifications in Basic Gang Specialist Program, Management and Supervision of Gang Specialists, and Gang Investigations in Public Schools.

In 2004, the Drug Diversion Unit experienced a dramatic 225% increase in 2004 over the number of offenses involving prescription drugs reported in 2003. The drug diversion detectives rose to the challenge investigating each report while still maintaining an extremely high overall clearance rate.

In 2004, the Narcotics Squads, while working multiple investigations, contributed to the seizures of a large quantity of drugs. The total value of narcotics seized in 2004 was approximately 4.1 million dollars, which is a 443.3% increase as compared to the total drug seizures in 2003.

The Narcotics Squad initiated a long-term investigation targeting a complex organization involved in the distribution of ecstasy and methamphetamine. The investigation lasted close to a year and lead to the arrests of 18 individuals with over 50 felony counts involving the possession and distribution of methamphetamine, ecstasy, and cocaine.

The Vice Unit has also investigated illegal gambling operations. While working with the assistance of a neighboring city, a subject was arrested for running a gambling enterprise. A search warrant was executed at his residence and approximately \$88,000, which was being utilized as payouts for the bettors, was seized.

The CCU squad was instrumental in the online investigations targeting individuals seeking children for illicit sexual activity. The unit was able to conduct a number of investigations that resulted in the arrest of 12 subjects with charges ranging from Use of a Communications Device to facilitate certain crimes involving children and Attempted Indecent Liberties of a Minor; both of which are felonies. In addition, the CCU charged two subjects with Possession of Child Pornography. One of the cases led to the seizure of a suspect's residence, which was forfeited by the court. The seizure led to the unit receiving a check in the amount of \$114,367, which was a portion of the proceeds from the sale of the forfeited property. In addition, the CCU conducted approximately 26 forensic examinations of computer systems in an effort to retrieve evidence of a variety of criminal violations such as Child Pornography.

Due to the expertise of the members of the unit in regard to undercover operations and surveillance, the members of SI have also been instrumental in assisting in homicide, robbery, and other investigations within the department.

VOLUNTEER PROGRAM

The Virginia Beach Police Department's Volunteer Program has continued to be successful. In 2003, volunteers invested over 13,255 hours at a cost savings of \$126,148.36. In 2004, volunteers doubled their involvement by investing over 31,118 hours and saving the city and the department over \$321,443.

The Virginia Beach Police Department offers volunteer opportunities for all age groups and interests. Some of the volunteer positions are: Animal Control Caretaker; Animal Control Humane Enrichment Volunteer Program for Youth; Assistant Volunteer Resource Manager; Automotive Aide; Auxiliary Officer; Chaplain; Clerical Support; Cold Case Investigator; Community Service Officer; Data Entry Clerk; Explorer Scout; Forensic Clerk; Helicopter Flight Officer; Parking Enforcement Officer; Precinct Desk Officer; Property and Evidence/Equipment and Supply Support; and Stable Hand. Our citizens also volunteer with organizations that work directly with the police department. Those organizations are: Citizens Advisory Committee/Board; Crime Solvers Board; Friends of the Mounted Patrol; and the Neighborhood Watch Program.

Animal Control's newest volunteer program, Humane Enrichment Volunteer Program, began in November of 2004 and is a program directed toward young people between the ages of 13 and 17. With its ten members, this program gives young people the opportunity to learn and administer humane treatment of animals in their care.

Additionally, Steven Prescott, a volunteer in the First Precinct, received the Virginia Beach Rotary Club's Volunteer of the Year Award for 2004.

If you are interested in finding out more about volunteer opportunities, contact the Virginia Beach Police Department's Volunteer Coordinator at 427-4970.

SUPPORT DIVISION

The Support Division consists of several units and provides administrative and support services to other Virginia Beach Police Department operations, City of Virginia Beach agencies, and to the public.

The Office of Planning and Analysis is responsible for research and development, mapping, preparation of statistical reports and documents, and coordination of the department's Internet and Intranet web sites. This office works closely with Systems Support, which coordinates the department's Wide Area Network, the automated criminal justice records management system, and special technology projects.

Members of the Records Unit enter various data into automated systems, such as arrest warrants and traffic accident reports. They assist the public in obtaining various permits and copies of reports. The Crime Reporting Unit's offense clerks enter all criminal offense reports into the automated records system and assist the Virginia Criminal Information Network (VCIN)/National Crime Information Center (NCIC) clerks in their responsibilities with the state criminal information system.

Members of the Logistical Support Unit are responsible for maintaining the security of all evidence that is stored for criminal investigations and prosecutions, as well as found property. They also order and issue uniforms, supplies, and other police equipment.

The Payroll Unit prepares a bimonthly payroll for more than 1,000 sworn and civilian employees. The division's manager, accountant, and administrative technician coordinate many of the department's fiscal matters, including budget development and monitoring, grant coordination and tracking, and procurement.

Accomplishments

Support Division staff continues to coordinate the department's efforts in expanding the automated regional information sharing systems (CRIMES—the Comprehensive Regional Information Management Exchange System, and LINX – Law Enforcement Information Exchange). The expansion to LINX should be completed in 2005.

Planning and Analysis staff completed an environmental scan of reported crime, juvenile and adult arrests, various demographic information and presented it to several city agencies. This project was at the request of the Safe Community Strategic Issue Team.

Police and ComIT staff installed two servers to address data network bandwidth limitations between the Municipal Center and the police precincts and bureaus located in various areas of the city. The project was completed to increase the speed of data transmission and to assure the police department was in a position to take advantage of newer versions of its automated records management systems.

The department completed its transition to the new model service weapon in 2004. A combination of general fund monies, appropriations from the "Police Store Fund," the department's Property and Evidence accounts, and through funds generated through a "buy back" program paid for this transition over a three-year period. Property and Evidence staff members were integral during this transition.

At the end of 2004, there was approximately \$4.5 million in federal and state grant funds being managed by the police department.

Incident Based Reporting

Incident Based Reporting (IBR) is a federal and state system for collecting and reporting crime data. Three major differences exist between the IBR system and the old reporting system, **Uniform Crime Reporting (UCR)**.

First is the expansion of the eight UCR Part I crimes to 22 IBR Group A Crimes. Many of the offenses previously recorded in the Other Reported Offenses Report (Part II Crimes) are now included in the Group A Crimes list. Second is the method of submitting data. Under the UCR system, summary data was submitted for the Part I offenses and arrest categories. Under the current IBR system, up to 144 data elements for each incident and arrest are submitted. And finally, under the IBR, each offense (the crime) that occurs during the incident (the event) is counted. Under the UCR rules, only the most severe offense is counted. For example, if a rape and robbery occurred in the same incident, under IBR both the rape and robbery are counted. Under the UCR system, only the rape is counted.

IBR requires strict adherence to rules set by the state. If a rule is not strictly followed, the incident cannot be submitted. This sometimes occurs when information required by the State conflicts with the facts of the case.

Please note that the figures on this report may differ from those released at the local level. This discrepancy is due to the strict requirements for submission. The Virginia Beach Police Department will continue to provide data in the UCR format so that comparisons and trends can be identified using the same methodology. Comparisons between UCR data and IBR data should not be made due to different collection methods.

Source: FBI Crime in the United States 2003

The FBI's Crime in the United States 2003 is the source for the population figures and reported crime contained in this report. The report did not use the U.S. Census Bureau 2000 population figures. Virginia Beach Crime figures differ somewhat from official figures released by the Virginia Beach Police Department.

The 2003 Crime in the United States discontinued use of the Modified Crime Index. For the purpose of continuity, this chart calculates the index using the total crimes for murder, rape, robbery, aggravated assault, burglary, larceny, motor vehicle theft, and arson divided by the population listed in the publication.

Only cities with crime totals for murder, rape, robbery, aggravated assault, burglary, larceny, motor vehicle theft, and arson are included.

**Virginia Beach is listed as having the lowest violent crime rate among cities with population of 215,000 or more.

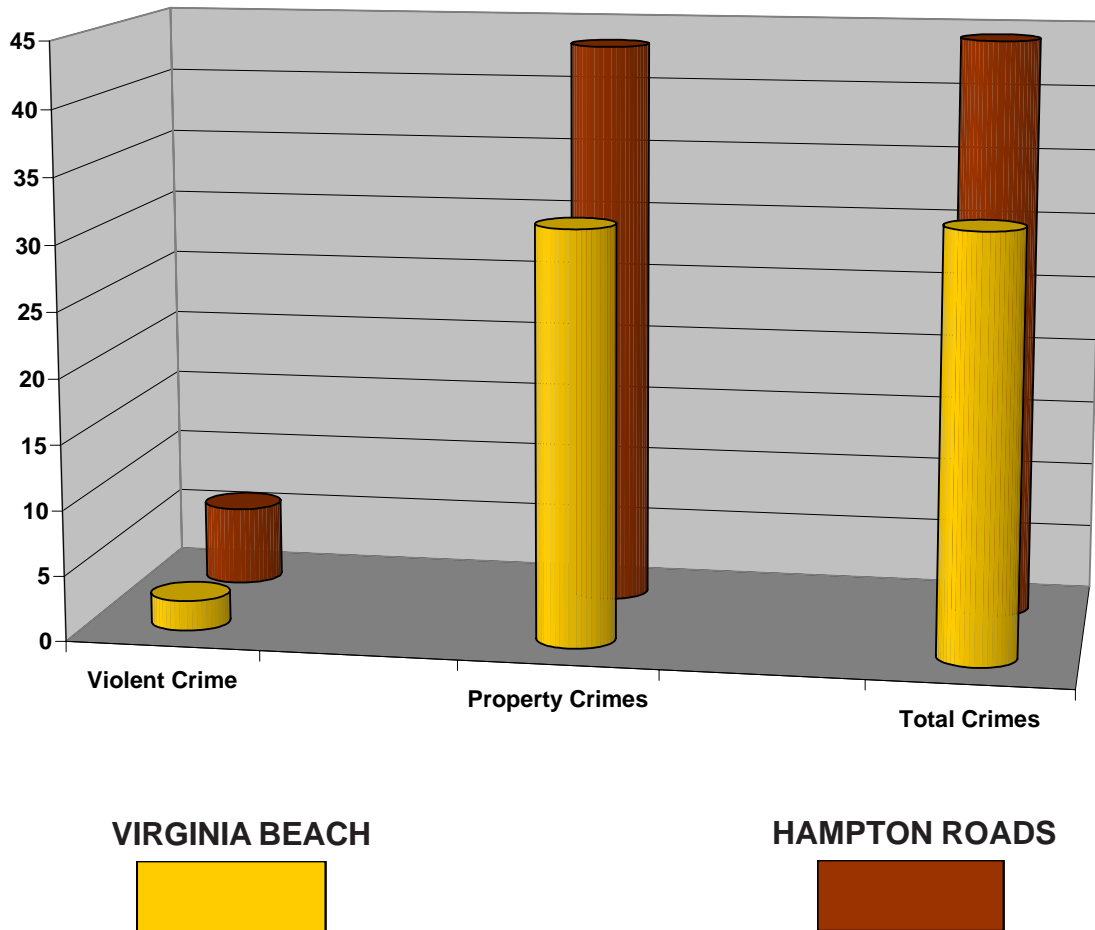

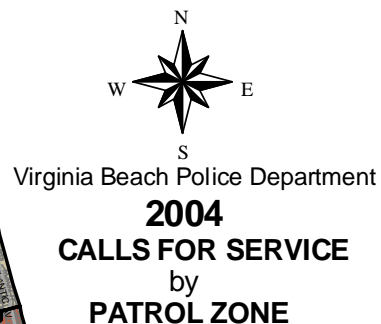

2004 PART I CRIME RATE PER 1,000 HAMPTON ROADS VS. VIRGINIA BEACH

Crimes	Hampton Roads	Virginia Beach	% Difference
Violent Crime	6.0	2.3	-61.67%
Property Crimes	43.4	31.5	-27.42%
Total Crimes	44.3	32.1	-27.54%

Note: Hampton Roads represents average crime rate per 1,000 citizens for Hampton, Newport News, Portsmouth, Suffolk, Norfolk and Chesapeake. Chesapeake's crime was estimated. Figures do not include Arson.

VIRGINIA BEACH POLICE DEPARTMENT CRIME RATES PER 1,000 CITIZENS HAMPTON ROADS VS. VIRGINIA BEACH

Note: This map reflects total calls for service per zone, not calls per resident. More populous zones may also have more calls for service.

**VIRGINIA BEACH POLICE DEPARTMENT
UNIFORM PATROL CALLS FOR SERVICE
DAY OF WEEK 2004**

**VIRGINIA BEACH POLICE DEPARTMENT
UNIFORM PATROL CALLS FOR SERVICE
TIME OF DAY 2004**

In 2004, there were 9,414 reported crashes in the City of Virginia Beach. this was a 3.4% decrease from the 9,740 reported crashes in 2003. Of these accidents 19 were fatal resulting in 19 fatalities.

There were 2,202 hit and run crashes in 2004 which was 23.4% of the total reported. There was a 0.6% increase in hit and run crashes compared to 2003.

In 2004, there were 118 pedestrians hit by motor vehicles which was a 4% increase from 2003.

Of the 12 fatalities occurring in 2004 where seatbelts were available for use, 9 (75%) were not wearing seatbelts. This does not include crashes involving motorcycle, pedestrian, or bicycle fatalities.

10 (53%) of the 19 fatal crashes were alcohol/drug related, with 2 pedestrians, 1 bicyclist, and 1 scooter operator under the influence of alcohol. 10 of the 19 total victims were legally intoxicated (.08 BAC or higher).

In 8 (42%) of the fatal crashes the victim was using alcohol.

Of the 19 fatal crashes 9 (47%) involved vehicle drivers who were at fault and victims in the crash.

Of the 19 fatal crashes in 2004, 6 (32%) occurred between the hours of 11 p.m. and 7 a.m.

In the 19 fatal crashes, 14 (74%) of the individuals at fault were male.

Of the 19 fatalities occurring in 2004, 4 (21%) of the victims were under the age of 21.

There were 4 pedestrians killed in 2004 which decreased from 5 in 2003.

Note: Includes summonses issued to juveniles

These reflect the assignment of the officer at the time the summons was written.

DUI arrests do not match UCR totals due to differences in calculations.

*A change was made in 2002 in the method of calculation for the above figures causing an increase in the number of summonses and DUI arrest. Hierarchy rule not used. Please contact Planning and Analysis for previous year figures.
