## Executive Summary

### 2015 Survey Responses

Perceptions of crime appear to be highest among the Campus East sub-set residents. The neighborhood subset had the highest percentage of respondents in agreement with five of the eight questions used to assess perceptions of crime and potential for victimization. Campus East had the second highest rates for property crime, total part I crimes, and drugs law violations. An additional factor that may be influencing residents' perception of crime is the neighborhood's proximity to Lake Edward. The Lake Edward area selected for the 2015 Neighborhood Survey had the highest rate of crime across all categories.

Respondents reported drugs being a problem in all neighborhoods. Green Run 1<sup>st</sup> had the lowest percentage of respondents (19.8%) in agreement with the statement 'Drugs are a problem in my neighborhood,' and Lake Edward Area had the highest percentage of respondents in agreement with the statement (38.4%). The Lake Edward area also had the second highest percentage of respondents reporting agreement with the statement 'Guns are a problem in my neighborhood' (43.2%). This is consistent with 2014 crime data: Lake Edward had both the highest rate of weapon law violations (1.4) and the highest rate of drug violations (5.3 per 100 address points). The Emerald Point/Washington Square area had the lowest crime perception showing favorable change in six of the eight questions used to assess perceptions of crime, and had the highest percentage of respondents (87.7%) who agreed with the statement "The police department does a good job of making me feel safe in this neighborhood."

Through comment analysis a trend was apparent when respondents were asked to "Provide some recommendations that you feel the police department could use to improve this relationship." In all neighborhoods respondents top 3 recommendations included: "Increase Patrols," "Bike/Foot Patrols Requested," and "Increase Community Involvement/Communications." In addition to recommendation comments residents commented on problems in their community that concerned them and 4 out of the six neighborhoods reported issues related to burglaries/thefts, juvenile related, and gun related. Drug related issues and traffic related issues were also reported in 2 or more neighborhoods.

### 2014 and 2015 Survey Response Comparison

The Lake Edward subset, Campus East subset, and Pecan Garden areas were surveyed both in 2014 and 2015. The Lake Edward Area showed favorable change in seven of the eight questions used to assess perceptions of crime. This is contradicting to the actual crime stats because Lake Edward is ranked the highest in all areas of crime; property crime, violent crime, total crime, drug law violations, and weapon law violations. Interestingly enough Lake Edward respondents came in second to Campus East respondents to the statement 'Crime is generally a problem in my neighborhood' with 37.0% of respondents agreeing with that statement. Lake Edward residents were also runner up to Campus East with the statement 'Guns are a problem in my

neighborhood' with 43.2% of respondents in agreement. Campus East showed favorable change in six of the eight questions used to assess perceptions of crime. The Campus East sub-set was ranked second compared to the other selected neighborhoods in property crime, total crime, and number of drug violations. The Pecan Gardens area also showed unfavorable change in six of the eight questions used to assess perceptions of crime; however they had the lowest rate of property crime and total crime out of the surveyed neighborhoods.

### **2013, 2014, and 2015 Survey Response Comparison**

The Emerald Point/Washington Square area and Green Run areas were the only neighborhoods that were surveyed in 2013, 2014, and 2015. The Emerald Point/Washington Square area experienced unfavorable changes across seven of the eight of the questions used to assess perceptions of crime. Most notably, 17.1% respondents reported being 'More afraid of crime now than I have ever been.' The Emerald Point/Washington Square area also experienced a decrease in the number of respondents answering 'No' to the statement 'Are there problems in your community that concern you?'" Green Run 1<sup>st</sup> and Green Run 4<sup>th</sup> experienced an increase in the percentage of respondents in agreement with statements assessing the perception of crime. The Green Run 4<sup>th</sup> area experienced unfavorable changes in eight of the eight questions used to assess perceptions of crime. Approximately 16.2% of Green Run 4<sup>th</sup> respondents agreed with the statement 'Crime is generally a problem in my neighborhood' and 4.0% of respondents agreed with the statement 'There is a good chance that I will be the victim of a violent crime in this neighborhood next year.' Similarly, Green Run 1<sup>st</sup> experienced unfavorable changes in seven of the eight questions used to assess perceptions of crime. Mirroring Green Run 4<sup>th</sup>'s area, Green Run 1<sup>st</sup>'s area had 16.1% of respondents that agreed with the statement 'Crime is generally a problem in my neighborhood.' It should be noted that Green Run 1<sup>st</sup> Area tied with Pecan Gardens for the lowest Violent Crime rate at 0.3 per 100 addresses.

## 2015 Survey Highlights

The survey highlights identify neighborhoods with the highest and lowest percentage of respondents in agreement with each statement regarding perceptions of crime, as well as the highest and lowest crime rate per 100 address points<sup>1</sup> for each Part I Crime category. The survey highlights also include the percentage of respondents in agreement with the statements regarding the Police Department, and the percentage of respondents that reported knowing their neighbors moderately or extremely well.

### First Precinct

#### Green Run Area 1<sup>st</sup>

- Green Run 1<sup>st</sup> had the lowest (16.1%) percentage of respondents in agreement with the statement ‘Crime is generally a problem in my neighborhood.’ They also tied for the second lowest Total Crime Rate (4.3 per 100 addresses).
- Green Run 1<sup>st</sup> had the lowest (19.8%) percentage of respondents in agreement with the statement ‘Drugs are a problem in my neighborhood.’
- Green Run 1<sup>st</sup> had the second highest (83.2%) percentage of respondents that agreed with the statement ‘The Police Department does a good job of making me feel safe in this neighborhood.’
- Green Run 1<sup>st</sup> had the second highest (59.8%) percentage of respondents in agreement with the statement ‘People in this community have a good relationship with the Police Department.’
- When asked ‘How well do you know your neighbors,’ 18.14% of Green Run 1<sup>st</sup> respondents reported knowing their neighbors moderately or extremely well.

### Second Precinct

#### Emerald Point/Washington Square

- Emerald Point/Washington Square had the lowest (1.7%) percentage of respondents reporting agreement with the statement ‘I often avoid going out during the day time because I am afraid of crime.’
- Emerald Point/Washington Square had the lowest (16.4%) percentage of respondents reporting agreement with the statement ‘I often avoid going out during the night time because I am afraid of crime.’
- Emerald Point/Washington Square had the lowest (10.1%) percentage of respondents in agreement with the statement ‘There is a good chance I will be a victim of property crime in this neighborhood next year.’

---

<sup>1</sup> An address point is defined as a single dwelling unit/household. It should be noted that while an apartment building consists of many dwelling units, it may be counted as a single address point due to limitations of the data. Address point data is provided by the City’s Center for Geo-Spatial Information Services.

- The Emerald Point/Washington Square had the lowest percentage (3.9%) of respondents in agreement with the statement ‘There is a good chance I will be a victim of violent crime in this neighborhood next year.’
- Emerald Point/Washington Square had the lowest (14.0%) percentage of respondents that agreed with the statement ‘Guns are a problem in my neighborhood.’ They had the lowest weapons violation crime rate (0.1 per 100 addresses).
- Emerald Point/Washington Square had the lowest (17.1%) percentage of respondents that agreed with the statement ‘I am more afraid of crime now than I have ever been.’
- Emerald Point/Washington Square had the lowest drug violation rate (1.1 per 100 addresses) but 23.9% of the respondents agreed with the statement ‘Drugs are a problem in my neighborhood.’
- The Emerald Point/Washington Square had the highest (87.7%) percentage of respondents in agreement with the statement ‘The Police Department does a good job of making me feel safe in this neighborhood.’
- Emerald Point/Washington Square had (57.3%) of respondents in agreement with the statement ‘People in this community have a good relationship with the Police Department.’
- Approximately 12.54% of Emerald Point/Washington Square respondents reported knowing their neighbors moderately or extremely well.

### Third Precinct

#### Campus East

- The Campus East neighborhood had the highest (45.8%) percentage of respondents in agreement with the statement ‘Crime is generally a problem in my neighborhood.’
- The Campus East neighborhood had the highest (27.1%) percentage of respondents in agreement with the statement ‘I often avoid going out during the night time because I am afraid of crime.’
- The Campus East neighborhood had the highest (6.8%) percentage of respondents in agreement with the statement ‘There is a good chance I will be a victim of violent crime in this neighborhood next year.’
- The Campus East neighborhood had the highest (50.8%) percentage of respondents in agreement with the statement ‘Guns are a problem in my neighborhood.’
- The Campus East neighborhood had the highest (30.5%) percentage of respondents that agreed with the statement ‘I am more afraid of crime now than I have ever been.’
- 83.1% of respondents agreed with the statement ‘The Police Department does a good job of making me feel safe in this neighborhood.’
- 50.8% of respondents agreed with the statement ‘People in this community have a good relationship with the Police Department.’

- Approximately 1.73% of Campus East respondents, the lowest of any neighborhood included in the 2015 Neighborhood Survey, reported knowing their neighbors moderately or extremely well.

### Lake Edward

- The Lake Edward neighborhood had the second highest number of respondents in agreement with the statements ‘Guns are a problem in my neighborhood’ (43.2%) and the highest rate of weapon law violations (1.4 per 100 addresses).
- The Lake Edward neighborhood had the highest number of respondents for ‘Drugs are a problem in my neighborhood’ (38.4%) and the highest rate of drug offenses (5.3 per 100 addresses).
- The Lake Edward neighborhood had the highest total violent crime (2.3 per 100 addresses) and the highest property crime (6.4 per 100 addresses) making it the highest total crime area (8.7 per 100 addresses). They are the second highest (37.0%) respondents in ‘Crime is generally a problem in my neighborhood.’
- 67.1% of respondents agreed with the statement ‘The Police Department does a good job of making me feel safe in this neighborhood.’ This was the lowest out of all the neighborhoods.
- 31.5% of respondents agreed with the statement ‘People in this community have a good relationship with the Police Department.’ This was the lowest out of all the neighborhoods.
- 4.31% of respondents reported knowing their neighbors moderately or extremely well.

### Fourth Precinct

#### Green Run Area 4<sup>th</sup>

- Green Run 4<sup>th</sup> neighborhood was second highest in agreement (14.8%) with the statement ‘There is a good chance that I will be a victim of property crime in this neighborhood next year.’ They are also the second highest neighborhood in property crime (6.1 per 100 addresses).
- 81.7% of respondents agreed with the statement ‘The Police Department does a good job of making me feel safe in this neighborhood.’
- 61.8% of respondents agreed with the statement ‘People in this community have a good relationship with the Police Department.’
- 16.63% of Green Run 4<sup>th</sup> respondents, the highest of any neighborhoods, reported knowing their neighbors moderately or extremely well.

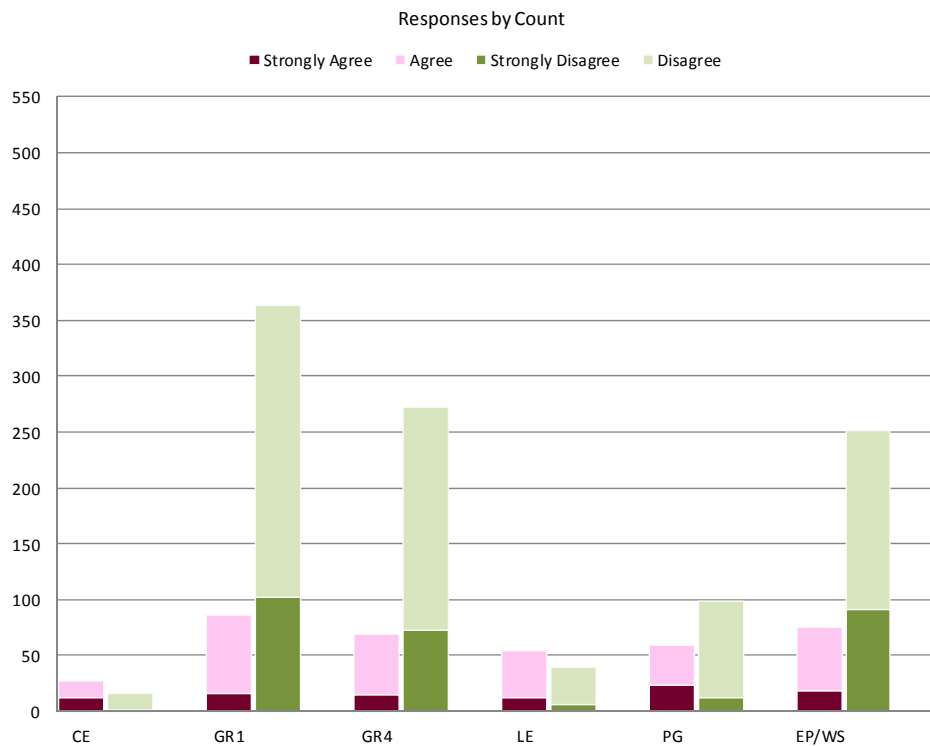

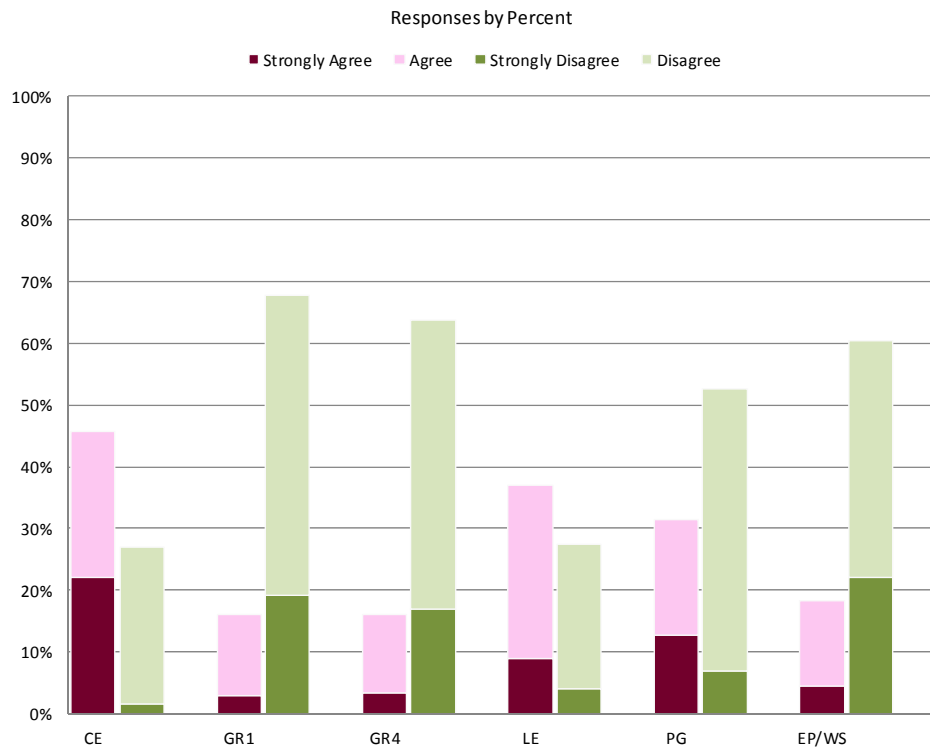

### Pecan Gardens

- Pecan Gardens had the lowest property crime rate (1.4), the lowest violent crime rate (0.3), and the lowest total crime rate (1.6) per 100 addresses. They were also the second lowest in weapons violations (0.4) and drug violations (1.4) per 100 addresses.

- Pecan Gardens neighborhood had the highest (5.9%) respondents that were in agreement with the statement 'I often avoid going out during the day time because I am afraid of crime.'
- Pecan Gardens neighborhood had the second highest (25.0%) respondents that were in agreement with the statement 'I often avoid going out during the night time because I am afraid of crime.'
- Pecan Gardens neighborhood had the highest (15.4%) respondents who agreed with the statement 'There is a good chance that I will be a victim of property crime in this neighborhood next year.'
- 75.5% of respondents agreed with the statement 'The Police Department does a good job of making me feel safe in this neighborhood.'
- 50.5% of respondents agreed with the statement 'People in this community have a good relationship with the Police Department.'
- 6.65% of respondents in Pecan Gardens reported knowing their neighbors moderately or extremely well.

## Third Precinct

### Survey Respondent Map – Campus East and Lake Edward Subsets

## Campus East Area – Subset

### Comparison of 2014 and 2015 Survey Respondents

Subset of Campus East (2014 - 58 Respondents; 2015 - 59 Respondents)						
	Total Agree %			Total Disagree %		
	2014	2015	14/15 Change	2014	2015	14/15 Change
Neutral and No Answers are not shown.						
Crime is generally a problem in my neighborhood.	58.6	45.8	-12.8	17.2	27.1	9.9
I often avoid going out during the DAY TIME because I am afraid of crime.	6.9	3.4	-3.5	84.5	89.8	5.3
I often avoid going out during the NIGHT TIME because I am afraid of crime.	43.1	27.1	-16.0	37.9	59.3	21.4
There is a good chance that I will be a victim of a PROPERTY CRIME in this neighborhood next year.	25.9	11.9	-14.0	41.3	66.1	24.8
There is a good chance that I will be the victim of a VIOLENT CRIME in this neighborhood next year.	20.6	6.8	-13.8	55.2	78.0	22.8
Guns are a problem in my neighborhood.	50.0	50.8	0.8	24.1	30.5	6.4
Drugs are a problem in my neighborhood.	34.5	37.3	2.8	36.2	28.8	-7.4
I am more afraid of crime now than I have ever been.	48.3	30.5	-17.8	36.2	50.8	14.6
The Police Department does a good job of making me feel safe in this neighborhood.	63.8	83.1	19.3	24.1	6.8	-17.3
People in this community have a good relationship with the police.	41.3	50.8	9.5	22.4	6.8	12.5

Blue shows favorable change and red shows unfavorable change.

- Favorable change from the 2014 survey occurred in many of the above statements; most notable is the 17.8 point decrease in residence stating “I am more afraid of crime now than I have ever been.”
- Also noteworthy is the increase of positive attitudes towards police, with 19.3 points more residents agreeing with the statement “the police department does a good job of making me feel safe in this neighborhood” than in 2014.

Subset of Campus East (2014 - 58 Respondents; 2015 - 59 Respondents)						
	No			Yes		
	2014	2015	14/15 Change	2014	2015	14/15 Change
Are there problems in your community that concern you?	19.0	37.3	18.3	81.0	55.9	-25.1
Within the past year, did anyone break into your home or steal any of your property?	87.9	88.1	0.2	12.1	10.2	-1.9
Within the past year, were you a victim of a crime of violence?	94.8	96.6	1.8	3.4	0.0	-3.4

Blue shows favorable change and red shows unfavorable change.

## Crime Data

Subset of Campus East (2014 - 58 Respondents; 2015 - 59 Respondents)						
Crime Rate per 100 Address Points*	Part I Property	Part I Violent	Total Part I Crimes	Drug Violations	Weapons Violations	
2012	4.9	0.8	5.7	2.1	1.8	
2013	4.9	1.3	6.2	2.1	1.8	
2014	5.7	1.0	6.7	3.1	0.5	

Total Offenses	Part I Property	Part I Violent	Total Part I Crimes	Drug Violations	Weapon Violations	
2012	19	3	22	8	7	
2013	19	5	24	8	7	
2014	22	4	26	12	2	

\*As of 2014, consisted of 384 address points. Crime data in IBR format.

- In 2014 Part I property crime increased, increasing the Total part I crimes. Drug violations also increased.
- Weapons Violations declined in 2014.

## Survey Respondent Demographic Characteristics

A complete chart including age ranges by gender is included in Appendix C on page 45.

## Appendix A – Methodology

In 2015, the Virginia Beach Police Department surveyed six neighborhood areas: Campus East, Emerald Point/Washington Square, Green Run (1<sup>st</sup> and 4<sup>th</sup>), Lake Edward, and Pecan Gardens. The area of Emerald Point/Washington Square, Green Run 1<sup>st</sup>, and Green Run 4<sup>th</sup> were previously surveyed in 2013, 2014, and again in 2015. The subsets of Lake Edward and Campus East were surveyed in 2014, and again in 2015.

The analysis of survey data includes a comparative summary of previous survey results for all areas. Consistent with prior years, door to door survey method was used to gather data. Each precinct designated a single night to distribute surveys and uniformed Virginia Beach Police Officers went door to door to administer the survey. Survey respondents were permitted to complete the survey themselves or they could dictate their answers to the officers. The latter was the most widely used survey completion method. Completed surveys were entered into a Microsoft Excel table at each precinct by a designated Precinct Desk Officer. A survey ID was applied to each physical survey and a corresponding ID was entered into the Excel table. The resulting Excel files were combined into a single Excel table to be used for data analysis.

All crime data included as part of the analysis is in IBR format. Due to the dynamic nature of crime data, crime rates are calculated at the time of survey analysis for all three years and may not match rates reported in previous years. Part I Property Crime is comprised of burglary, larceny, motor vehicle theft, and arson. Part I Violent Crime includes homicide, rape, robbery, and aggravated assault. At the end of the 2013 calendar year the FBI broadened the definition of rape to include forcible rape, forcible sodomy, forcible indecent liberties, and sexual assault with an object. Figures reported in this analysis reflect the new definition of rape. Total Part I Crime is the sum of property and violent crime. Drug and weapon law violations are evaluated separately and are not included in the total crime rate.

Crime occurring on streets bordering a neighborhood area was included in the crime totals as it would directly impact residents' perception of crime. Crime rates were calculated using address points as of 2015. An address point is defined as a single dwelling unit/household. It should be noted that while an apartment building consists of many dwelling units, it may be counted as a single address point due to limitations of the data. Address point data is provided by the City's Center for Geo-Spatial Information Services. Address points were used because the neighborhood areas selected do not align with Census block groups, making it difficult to provide a reliable population estimate for each neighborhood area.

The door to door interview method utilized a convenience sample and may not be an accurate representation of neighborhood area demographics. Generalization of results should be made with caution.

## 2015 Neighborhood Survey Tool – Page 2

2015	Virginia Beach Police Department Community Survey
<p>1 – Strongly Agree    2 – Agree    3 – Neutral    4 – Disagree    5 – Strongly Disagree</p>
