CALLS FOR SERVICE

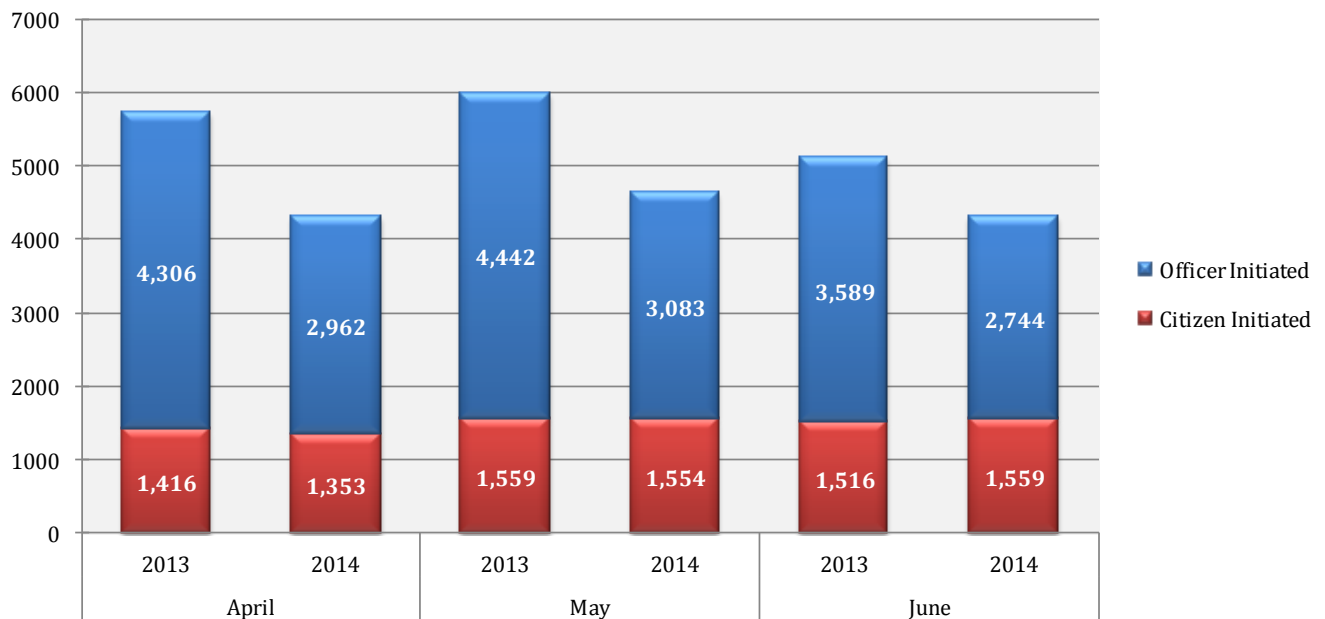

There was an overall decrease of 21% in the number of calls for service during the second quarter of 2014 when compared to the same time period in 2013. The decrease is a result of officer-initiated activity rather than citizen calls for assistance.

Officer-initiated activity decreased 29% from the same time period in 2013, and is consistent with levels in 2011 (2012 and 2013 were peak years). There were 25 fewer citizen-initiated calls for service during the 2nd quarter of 2014.

The 2014 year-to-date levels also show a significant decrease in calls for service, mostly attributed to officer-initiated activity.
